## Add new claims 26-34 as follows:

7.136 14.

A polyalkene amine which is substantially free of halides and has the

formula (I)

where

 $R_1$ ,  $R_2$ ,  $R_2$  and  $R_4$ , independently of one another, are each hydrogen or an unsubstituted or substituted, saturated or mono- or polyunsaturated aliphatic radical having a number-average molecular weight of up to 40000, at least one of the radicals  $R_1$  to  $R_4$  having a number average molecular weight of from 150 to 40000, and

R₅ and R₆, independently of one another, are each hydrogen, alkyl, cycloalkyl, hydroxyalkyl, aminoalkyl, alkenyl, alkynyl, aryl, arylalkyl, alkylaryl, hetaryl or an alkyleneimine radical of the formula (II)

where

## MELDER et al., DIV of SN 09/180,294

Onny.

Alk is a straight-chain or branched alkylene,

m is an integer from 0 to 10, and

R<sub>7</sub> and R<sub>8</sub>, independently of one another, are each hydrogen, alkyl, cycloalkyl, hydroxyalkyl, aminoalkyl, alkenyl, alkynyl, aryl, arylalkyl, alkylaryl or hetaryl or, together with the nitrogen atom to which they are bonded, form a heterocyclic structure,

or  $R_5$  and  $R_6$ , together with the nitrogen atom to which they are bonded, form a heterocyclic structure, it being possible for each of the radicals  $R_5$ ,  $R_6$ ,  $R_7$  and  $R_8$  to be substituted by further alkyl radicals carrying hydroxyl or amino groups.

A polyalkene amine as defined in claim 26, of the general formula (IV), whose polyalkene portion is formed of  $C_2$ - $C_4$  alkene monomers.

26. A polyalkene amine as defined in claim 27, wherein the C<sub>2</sub>-C<sub>4</sub> alkene is 1-butene or isobutene.

A polyalkene amine as defined in claim 26, which is derived from a reactive polyalkene with a high proportion of terminal double bonds.

A polyalkene amine as defined in claim 26, wherein the amine portion is derived from a nitrogen compound of formula (V).

A polyalkene amine as defined in claim 30, wherein the nitrogen compound is selected from ammonia, ethylene-1,2-diamine, propylene-1,2-diamine, propylene-1,3-diamine, butylene diamines, the mono-, di- and trialkyl derivatives of said
